

# MX2 IP54 INVERTER

Flexibility and robust design for standalone solutions

» Robust metal housing

» Freedom for user customization

» Built-in logic programming

# MX2 IP54

## Robust and flexible inverter...

The MX2 IP54 inverter is designed in a robust housing for distributed installation. A built-in class 1 EMC filter, the easy wiring access and the front-mounted USB connector make installation and commissioning simple. The freedom for users to customize the hardware by adding accessories provides hardware flexibility whilst the built-in logic programming is ideal when designing decentralized projects. Finally, by using the standard MX2 series functionality and communication option boards, the MX2 IP54 is the perfect choice for your standalone inverter solutions.

### Industrial communication networks

- Modbus RS485 built-in
- Option boards for EtherCAT, DeviceNet, PROFIBUS, CompoNet, ML-II and EtherNet/IP

### Front-mounted USB connector

- Easy access for set-up and commissioning
- Mini-B type connector same as standard MX2 series

### Wiring access holes

- 6 access holes for application wiring. Ideal for power supply, motor power, I/O and communication cables.

Note: The cable glands are not delivered with the MX2 IP54 housing.

IP54 

### Robust metal housing

- Dust and splash water protection
- 4 housing types covering full power range from 0.1 to 15 kW

EtherCAT 

DeviceNet

### Built-in RFI filter

- Class 1 EMC filter
- According with EN61800-3 requirements for use in domestic or industrial environments

### Freedom for user customisation

- Front panel holes prepared for accessories such as indicators, push-button, switches etc.
- DIN rail mounting options: safety relay, motor contactor, external power supply etc.

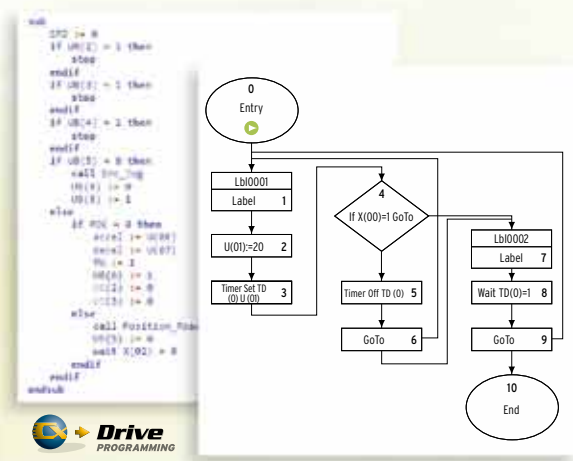

Note: The MX2 housings are delivered with the panel holes covered by IP54 blinding plugs. The panel holes are 22.3 mm in diameter.

## ... born to drive machines

The MX2 is specifically designed to drive machines. It has been developed to harmonise advanced motor and machine control. Thanks to its advanced design and algorithms the MX2 provides smooth motor control down to zero speed, plus precise operation for fast cyclic operations and torque control capability in open loop. The MX2 also gives you comprehensive functionality for machine control such as positioning, speed synchronisation and logic programming. The MX2 is fully integrated within the Omron Sysmac automation platform.

### Text editor and Flow chart programming

### Built-in logic programming

- Drive Programming functionality for decentralized machine control
- Flow chart and text editor programming languages
- 5 tasks running in parallel
- Up to 1000 lines per program

### Positioning mode

### Positioning functionality

- Simple positioning without the need of an external controller
- Selection of up to 8 pre-set positions plus homing function
- Switching between speed and position control modes

### Motor efficiency control

- Double rating VT 120%/ min and CT 150%/min
- Energy saving function
- IM and PM motor control

### Quick response to load fluctuation

- MX2 provides accurate speed control with less than 2% error at 1 Hz
- Stable control without decreasing machine speed improves quality and productivity

### Load fluctuation

### 200% starting torque

- Near stand-still operation (0.5Hz)
- Smooth control of high inertia loads
- Control of fast cyclic loads

### Frequency response vs Torque

(Example with 7,5kW 4-pole motor)

# Product overview

## MX2 IP54 features

- Power range from 0.1 to 15 kW
- Built-in Class 1 EMC filter
- Ready to add hardware accessories
- 200% starting torque
- Torque control in open loop
- Double rating VT 120%/1 min and CT 150%/ 1 min
- IM and PM motor control
- Built-in logic programming

## Reference list

Voltage class	Specifications				Model		House type	
	Constant torque		Variable torque		Narrow housing type	Ready for user customization
